

—— 国内领先的机械表机芯制造商

辽宁孔雀表业有限公司坐落于美丽的边疆城市辽宁省丹东市,前身是辽宁手表厂,始建于1957年,是国内三大制表基地之一。丹东不仅拥有得天独厚的地理优势和气候环境,还是中国手表制造业的发源地,因此被誉为“东方日内瓦”。

经过多年的努力拼搏,孔雀表业已经成为中国钟表陀飞轮手表制造(丹东)基地。

陀飞轮介绍

陀飞轮是瑞士钟表大师路易·宝玑先生在1801年发明的一种钟表调速装置。法文Tourbillon，为急速旋转之意。是指装有“旋转擒纵调速机构”的机械表，陀飞轮机构，是为了校正地心引力对钟表机件造成的误差。由于其独特的运行方式，已经把钟表的动感艺术美发挥到登峰造极的地步，历来被誉为“表中之王”。

功能：

手动上弦，中心偏上2mm时针、分针指示，6点位陀飞轮、小秒。

使用调整方法：

把的位置“1”手动上链
把的位置“2”拨针校时

时尚搭配

精钢表壳，多颜色硅胶表带，对应多颜色底盖玻璃。

表面选用不同的颜色，搭配夜光，整体设计时尚抢眼。

手表描述
03

产品名称:
TIME COLOR 陀飞轮手表

产品型号: P506-1 P506-2

机芯型号: SL5003A

表壳直径: 45mm

表壳厚度: 14mm

防水深度: 50m

陀飞轮机芯

蓝宝石表镜

优质精钢表壳

硅胶表带

如何确保机械表经久耐用、精密准确

磁场：避免将手表放在发生磁场的电器或有磁性的物体旁边，可能引起手表暂时性停走或不准，如确定磁化应进行专业的消磁处理。

撞击：避免手表受到撞击，避免机芯和手表外观材质造成损伤。

非螺旋式表冠：将表冠按回正常位置，以防水汽进入手表机件。

清洁：表壳使用牙刷沾肥皂水清洗，然后以软布擦干。经常擦拭表壳上的灰尘积物、汗水等。避免在强酸、强碱等场合下戴表操作。

化学品：溶剂、清洁剂、香水、化妆品等可能损坏表壳或垫圈，应避免直接与其接触。

温度：避免暴露于气温极高或极低（高于60°C、低于-20°C），以及温差极端变化的环境。

防水：50米防水属于防溅水级别，只能满足基本的洗手、淋雨不摘手表。手表的防水性能是无法保证永久不变的，当中可能会受到垫圈老化或意外撞击表冠所影响。

应相隔多久做定期维修

如所有精密仪器，手表亦需定期保养、维修，以确保运行无误。由于表款、气候、佩戴者保养状况各有不同，因此我们无法明确指示定期维修相隔期。一般而言，每2至3年应将手表送往专业的维修点维修。

应在哪里做维修

我们建议您将手表送至PEACOCK维修中心完成专业检修工作，并可保证检验完善。

公司地址：辽宁省 丹东市 振兴区 金泉四路 18号 辽宁孔雀表业有限公司

联系电话：400-7909-888

为保持手表的表带经久耐用，
建议您注意以下各事项：—————

- 避免被氧化和受到外界极端环境影响。所谓极端环境，例如：超高温、超低温、或受到表带难以承受的外力等。
 - 避免阳光直射和温度偏高，如果长时间不戴，可以将它放置在不透气的塑料袋排除空气保存。
 - 避免与腐蚀性物品接触（如：洗衣粉等）。
 - 避免与锋利物品相接触。
-

保修说明

产品编号：—————

售出日期：—————

保修期：—————

- 1.人为损坏，表外观上的变化，外部条件异常导致的损坏，不在保修范围内。
- 2.产品本身质量问题，请立即与公司联系，切勿自行拆卸，否则不予保修。
- 3.保修时请携带此卡，到指定维修中心维修。
- 4.联系电话：400-7909-888

Tourbillon Introduction ---

Tourbillon, in French means whirlpools, was invented by Swiss watchmaker Abraham Louis Breguet in the 18th century. For balancing out the effects of gravity in the various orientations, he places the balance wheel, escape lever and escape wheel in a cage, which then rotated as a unit. In this way, the overall effect of gravity gets balance out. However, this solution is very complicated, with the result that a tourbillon has become more a statement about watchmaker's skill rather than having any real performance advantage. People usually describe the tourbillon watch as king of the watch.

**Functions:**

Manuel winding, 2mm above Center
Hr/Min hands;
6H: Tourbillon, Small second.

Adjusting Method:

Crown position 1: Manuel winding;
Crown position 2: Time adjusting.

Fashion Collocation —

Stainless steel watch case, multicolor silicone watch strap, multicolor watch back glass. Multicolor watch dial, with luminous and fashion design.

WATCH DESCRIPTIONS 19

Watch Name:
TIME COLOR Tourbillon Watch

Product Mode:
P506-1 P506-2

Movement mode:
SL5003A

Case diameter: 45mm

Case thickness: 14mm

Water resistance:
50m

Tourbillon Movement

Sapphire Watch Glass

High Quality Stainless Steel Watch Case

Silicone Strap

How To Keep A Durable Life And Accuracy Of Mechanical Watches? ———

Magnetic Field: Please keep your watch away from magnet electrical equipment or any magnet. For it may influence the accuracy of watches, even stop running. As for a magnetization watch, a professional degaussing treatment should be carried out.

Shocks: Heavy shocks should be avoid. Because heavy shocks may damage the movement and external appearance of watches.

Non-screw-in Watch Crown: To push the crown back to the normal position for keeping water out.

Cleaning: Dirty watch case can be cleaned by a toothbrush with little soap-suds, then use a soft cloth to dry. Please clean the dust and sweat on the watch case regularly. Don't clean the watch in the strong acid or alkali environment.

Chemicals: Please keep your watch away from any direct touch of Solvent, cleaner, perfume and cosmetics. For these chemicals may damage the watch case or watch ring.

Temperature: Don't put the watch under the extremely high or low temperature.(higher than 60°C , lower than -20°C)

Water Resistance: 50m water resistance is only available for washing the hands or short-time rainfall. The water resistance of watches will be weakened during long-time wearing or accidental impacts on the crown.

What Is The Interval For Maintenance Of Watch? ———

As all precision instruments, the watch needs a regular maintenance and repair to make sure it works well. Due to the differences in the collections, climate and the maintenance condition of the wearers, we cannot clearly indicate the regular maintenance intervals. Generally, a watch need to do the maintenance every 2 to 3 years.

Where to do maintenance? ———

We suggest that you send your watch to the PEACOCK repair center for maintenance and inspection, it will be more professional.

Company Address: No.18 Jinqian Fourth Road, Zhenxing Dist, Dandong, Liaoning province
Liaoning Peacock Watch Co., Ltd

In Order To Keep The Strap Durable, Please Note The Following Items: _____

- Avoid being oxidized and subjected to extreme environment influences. The extreme environment includes ultra-high temperature, ultra-low temperature, or the strap get an unbearable external force.
 - Avoid exposure to the direct sunlight and high temperature. If you don't wear it for a long time, you can put it in an airtight plastic bag for keeping out the air.
 - Avoid direct contact with corrosive materials (For example, washing powders).
 - Avoid contacting with the sharp objects.
- _____

WARRANTY INSTRUCTIONS

Product No.: _____
Sale Date: _____
Warranty Period: _____

1. Man-made damages, changes in external appearance, and damage resulting from abnormal external conditions are not within the scope of maintenance guarantee.
2. For quality defect of the product, please contact the company immediately. Please don't disassemble it by yourself, Otherwise, maintenance guarantee will be rejected.
3. Please take this card for maintenance and it should be repaired in the appointed repair center.
4. Tel: 400-7909-888
